

COVID-19 UPDATE

Künzelsau, 06/11/2020

Dear business partners,

the second wave, which we all feared, has now arrived in Germany and Europe in the past few days. As in March, we are following the current situation very closely and are taking all the necessary steps to provide our employees and customers with the best possible protection.

We are 100% operational and are in permanent contact with our suppliers and forwarders to identify and avoid delivery bottlenecks at an early stage. The precautions taken enable us to reliably fulfill your orders as usual.

We have taken all necessary precautions within the company to prevent the spread of COVID-19-related infections. Visits from suppliers and customers have been suspended until further notice.

The hygiene regulations for all employees have been tightened once again. Within the company there is a general obligation to wear face masks. All employees work at a minimum distance of 1.5 meters - this applies to both production and administrative staff. A large part of the administrative staff works flexibly in the home office. The employees concerned have modern equipment for mobile working and can access all relevant systems as usual and can also be contacted as usual by e-mail and telephone.

The work of all departments of Rosenberg Ventilatoren GmbH is currently fully guaranteed, so that current orders are not affected. We count on your trust and optimism. Do not hesitate to submit your orders to us.

Please take care of yourself and stay healthy!

Best Regards

Rosenberg Ventilatoren GmbH

Jörg Noe

Managing Director Sales / R & D
